MEMORANDUM FOR THE RECORD

SUBJECT : Sensor Systems for U2-R

1. Installation provisions shall be made in the Q bay for the following photo reconnaissance systems:

- a. B configuration (73B or 73B-2) or
- b. Delta III configuration or
- c. H configuration or
- d. SD 4 or FFD-10 now under development.

Any of the above installed with T-35 tracker.

2. Drift Sight:

The present U2-C drift sight shall be modified to accommodate the additional fuselage depth. A quantity of 12 are required. One prototype to be delivered by June 1967 preceded by a wooden mock up in March 1967 and followed by one production drift sight each month starting in August 1967.

3. A study is to be conducted, directed toward the incorporation of an improved technical objective spotting camera for the nose installation providing 6" ground resolution at nadir and capable of providing high resolution photography of any targets within 70° of the flight path on either side of the aircraft. Convergent stereo will be provided.
